

## Assignment – 4

Team ID	PNT2022TMID44171
Student Name	Safeeq R
Student Roll Number	724019106015
College Name	Dhaanish Ahmed Institute Of Technology, Coimbatore.

**Qn: Write code and connections in wokwi for the ultrasonic sensor.**

### **Code:**

```
#include "Ultrasonic.h"
```

```
Ultrasonic ultrasonic(12, 13);
```

```
int distance;
```

```
void setup() {
```

```
    Serial.begin(9600);
```

```
}
```

```
void loop() {
```

```
    // Pass INC as a parameter to get the distance in inches
```

```
    distance = ultrasonic.read(CM);
```

```
    Serial.print("Distance in CM: ");
```

```
    Serial.println(distance);
```

```
    if (distance < 100)
```

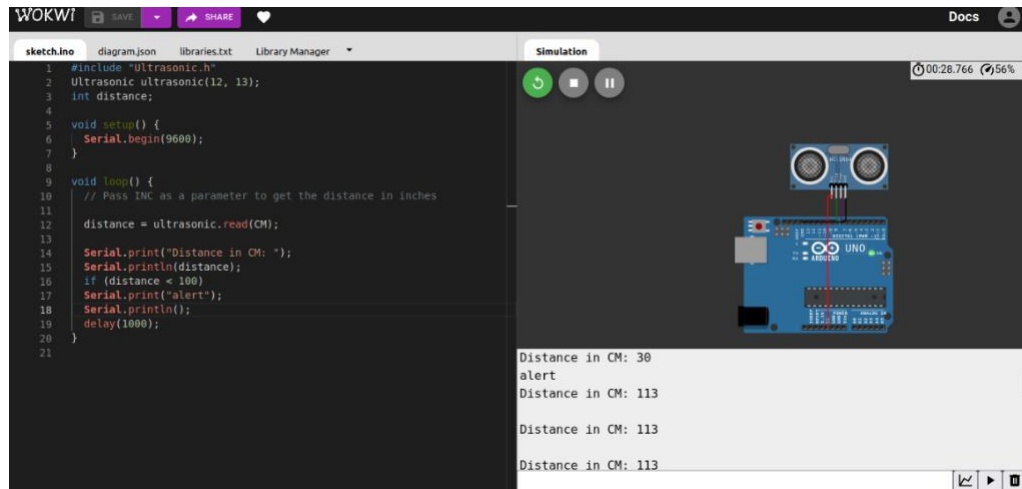

```
        Serial.print("alert");
```

```
        Serial.println();
```

```
        delay(1000);
```

```
}
```

## Output:

The screenshot displays the Wokwi IDE interface. On the left, the 'sketch.ino' file contains the following code:

```
1 #include "Ultrasonic.h"
2 Ultrasonic ultrasonic(12, 13);
3 int distance;
4
5 void setup() {
6   Serial.begin(9600);
7 }
8
9 void loop() {
10  // Pass INC as a parameter to get the distance in inches
11
12  distance = ultrasonic.read(CM);
13
14  Serial.print("Distance in CM: ");
15  Serial.println(distance);
16  if (distance < 100)
17    Serial.print("alert");
18  Serial.println();
19  delay(1000);
20 }
21
```

On the right, the 'Simulation' window shows a 3D model of an Arduino Uno board with an ultrasonic sensor module connected. Below the model, the serial output is displayed:

```
Distance in CM: 30
alert
Distance in CM: 113
Distance in CM: 113
Distance in CM: 113
```

The simulation window also includes a toolbar with play, stop, and reset buttons, and a status bar showing a timer at 00:28.766 and a battery level at 56%.
