

ASSIGNMENT 2

Team ID	PNT2022TMID44171
Student Name	Mohamed Asif M
Student Roll Number	724019106011
College Name	Dhaanish Ahmed Institute Of Technology, Coimbatore.

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature

PROGRAM:

```
import random
```

```
while(True):
```

```
    a=random.randint(10,99)
```

```
    b=random.randint(10,99)
```

```
    if(a>35 and b>60):
```

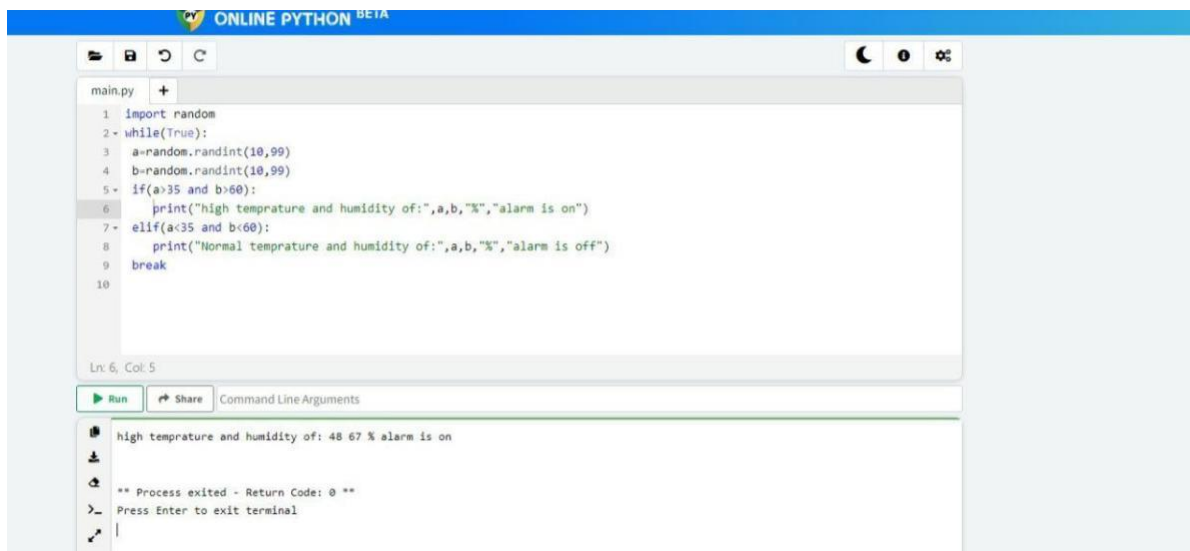

```
        print("high temprature and humidity of:",a,b,"%","alarm is on")
```

```
    elif(a<35 and b<60):
```

```
        print("Normal temprature and humidity of:",a,b,"%","alarm is off")
```

```
    break
```

OUTPUT:

The screenshot shows an online Python IDE interface. The code editor contains the following Python code:

```
1 import random
2 while(True):
3     a=random.randint(10,99)
4     b=random.randint(10,99)
5     if(a>35 and b>60):
6         print("high temprature and humidity of:",a,b,"%","alarm is on")
7     elif(a<35 and b<60):
8         print("Normal temprature and humidity of:",a,b,"%","alarm is off")
9     break
10
```

The output console shows the result of the execution:

```
high temprature and humidity of: 48 67 % alarm is on

** Process exited - Return Code: 0 **
Press Enter to exit terminal
```
